

INTERNATIONAL MASTER'S DEGREE PROGRAMME

UNDER THE AUSPICES OF THE UNESCO CENTRE

MANAGEMENT OF MINERAL RESOURCES SECTOR FACILITIES

OVERVIEW

The International Master's degree programme in Management of Mineral Resources Sector Facilities (in English) aims to train highly qualified managers of the mineral resources sector through the development of managerial, engineering and economic competences necessary for a dynamically developing business environment.

The programme provides a comprehensive approach to education and training using the research centres of Saint Petersburg Mining University and of the partner companies to develop advanced managerial and business engineering skills and research and development competences enabling quick adaptation to Industry 4.0.

PROGRAMME DETAILS

The programme includes 23 courses and 5 practical trainings and internships at the leading Russian companies and research centres, mineral resources sector companies, Federal Ministries and Departments.

The programme is taught by leading Saint Petersburg Mining University professors and professionals from the largest companies of the mineral resources and fuel and energy sectors.

The programme aims to foster students' skills in planning, project management, business problem-solving, implementing business ideas, developing unique strategies for company development in a new environment, as well as developing specific IT skills for the digital economy.
